

TRS-80[®] Agricultural Software Sourcebook

Radio Shack[®]

IMPORTANT NOTICE

This **Agricultural Software Sourcebook** is a compilation of numerous agricultural software programs prepared for use on the full line of TRS-80 Microcomputers. These programs are offered by the author or publisher and are listed at their request. All inquiries and correspondence for ordering and operation of the programs should be directed to the publisher of the program. All inquiries concerning the validation of the program should be directed to the user/test site reference shown in the program listing (if included by publisher). It is not appropriate to contact the user/test site reference when needing updates, documentation, or assistance in using the program; one should contact the publisher for user support.

Radio Shack® has not examined or tested the programs offered by other persons, firms, or companies. Radio Shack makes no warranties or recommendations, expressed or implied, with respect to these non-Radio Shack programs, including, but not limited to: availability, accuracy, reliability, capacity, of software or hardware, performance, hardware requirements, or whether such programs are merchantable and fit for the purpose for which they were intended. Further, Radio Shack is not responsible for errors occurring in the **TRS-80 Agricultural Software Sourcebook** listing.

Dear Reader:

With the publication of the **Agricultural Software Sourcebook**, Radio Shack goes beyond the general question asked by anyone purchasing a TRS-80® for agricultural computing purposes: What agricultural software is available for the TRS-80?

We wanted to answer more specific questions: What programs are available for a specific agricultural application? What are the user level of these programs? What hardware do they require? Who has used the program?

These were the types of questions not answered in other agricultural software directories or in typical magazine review. Since they are the critical questions upon which thoughtful purchase decisions are made, they needed to be answered.

To find those answers, we solicited information from the numerous agricultural software publishers and compiled their responses into the **Agricultural Software Sourcebook**.

Each new edition of the **Agricultural Software Sourcebook** will offer more programs, for your consideration, more answers to your questions, and more support for the increasing number of agricultural publishers.

We hope you will find this **Sourcebook** a valuable guide for locating the agricultural software you need.

Ron Stegall
Vice President
Computer Marketing
Radio Shack

HOW TO ADD YOUR PROGRAM IN THE NEXT EDITION

The **Agricultural Software Sourcebook** will be available at over 6,100 Radio Shack Stores and participating dealers, and at more than 390 Radio Shack Computer Centers offering sales, service, leasing and training in TRS-80 microcomputer products in the U.S.A. The **Radio Shack TRS-80 Agricultural Software Sourcebook** will be referenced at our Radio Shack Computer Centers, Computer Departments and authorized Franchise Dealers.

The **Agricultural Software Sourcebook** will be published periodically. Listings are for the term of one year and must be resubmitted or renewed at the end of twelve months following registration. The listing fee for commercial software is \$10.00.

All public domain programs submitted and furnished to users for only the cost of distribution (i.e., media, postage, and administration) will be listed in the **Agricultural Software Sourcebook** without fee.

To place a listing in the **Radio Shack Agricultural Software Sourcebook** for a period of one year, complete the form(s) at the back of this book and mail it with a \$10.00 check or money order to the following address:

TRS-80 Agricultural Software Sourcebook
Department AX-10
One Tandy Center
Fort Worth, Texas 76102

Make remittance payable to "Radio Shack." For ten or more listings, a special rate of \$5.00 per listing is offered. All programs submitted for a free public domain listing must contain a school or institutional address and have a nominal price for distribution (less than \$15.00) in order to qualify for this privilege.

Should you want one program listed under more than one category, separate listing forms and fees must be submitted for each listing. Provision has been made for listing Model I and Model III compatible software packages as a single listing.

Each listing submission containing an optional user site reference must have an attached written statement from the individual or institution giving Radio Shack permission to publish their name and address as the software publisher's reference for public inquiry.

All listings are accepted with the express understanding that Radio Shack shall have no liability for errors which may occur in the printed **Agricultural Software Sourcebook** listing, including the failure to include a listing, and in no event shall Radio Shack be liable for damages to any person submitting listings in an amount greater than the listing fee (\$10.00).

The 12 month listing is from the time of first publishing. Any subsequent **TRS-80 Agricultural Software Sourcebook** will carry your listing if you miss a publishing deadline.

All persons submitting agree not to induce Radio Shack sales personnel to promote the sale of listed software by payment of commissions, fees, or in any other manner.

HOW TO OBTAIN A LISTING FOR YOUR PROGRAM

To obtain a listing in the Radio Shack Agricultural Software Sourcebook for a period of one year, complete this form and mail it with a \$10.00 check or money order to the address below. Make remittance payable to "Radio Shack."

The Radio Shack Agricultural Software Sourcebook will accept only listings for agricultural or agricultural administrative TRS-80® programs. Requests to list computer software such as monitors or operating systems will be returned. Radio Shack reserves the right to reject any listing submitted by returning the payment to the sender.

All user site references must be confirmed in a written letter from the user giving Radio Shack permission to publish her/his name and address as the publisher's reference for public inquiry. The intention is to furnish agribusinessmen with software validation information. The user site reference can be any individual, or institution selected by the publisher for this purpose.

All listings are accepted with the express understanding that Radio Shack shall have no liability for errors which may occur in the printed Agricultural Software Sourcebook listing, including failure to include a listing, and in no event shall Radio Shack be liable for damages to any person submitting listings in an amount greater than the listing fee (\$10.00).

All persons submitting a listing agree not to attempt to induce Radio Shack sales personnel to promote the sale of listed software by the payment of commission, fees, or in any other manner.

HOW TO OBTAIN A LISTING FOR YOUR PROGRAM

To obtain a listing in the Radio Shack Agricultural Software Sourcebook for a period of one year, complete this form and mail it with a \$10.00 check or money order to the address below. Make remittance payable to "Radio Shack."

The Radio Shack Agricultural Software Sourcebook will accept only listings for agricultural or agricultural administrative TRS-80® programs. Requests to list computer software such as monitors or operating systems will be returned. Radio Shack reserves the right to reject any listing submitted by returning the payment to the sender.

All user site references must be confirmed in a written letter from the user giving Radio Shack permission to publish her/his name and address as the publisher's reference for public inquiry. The intention is to furnish agribusinessmen with software validation information. The user site reference can be any individual, or institution selected by the publisher for this purpose.

All listings are accepted with the express understanding that Radio Shack shall have no liability for errors which may occur in the printed Agricultural Software Sourcebook listing, including failure to include a listing, and in no event shall Radio Shack be liable for damages to any person submitting listings in an amount greater than the listing fee (\$10.00).

All persons submitting a listing agree not to attempt to induce Radio Shack sales personnel to promote the sale of listed software by the payment of commission, fees, or in any other manner.
